

PLEASE REJECT NAB'S PETITION 04-160! I pay for a service that provides me with very compresensive traffic and weather, not found anywhere else! No other radio station or television station provides this service as well as XM. It is a service I pay for, and therefore, should not be up to the NAB to take it away from me. How dare they even think to do this! While they're at it, why don't you take my Weather Channel away from my television cable. There's no end to this!
